

Maderas Golf Club San Diego

Tucked away amidst the rolling hills of north San Diego, just minutes from San Diego's downtown is Maderas Golf Club. A combination of golf strategy and design mastery, this Johnny Miller and Robert Muir Graves design takes the concept of upscale golf to exhilarating levels. Beauty and challenge are both here, as holes wind through the cliffs, rock outcroppings, creeks, and forests of the inland country of north San Diego. Golf publications and players alike continue to tip their hat in respect, making Maderas one of San Diego's top rated golf courses. Award winning conditions, services and amenities tell a true Southern California story.

Proceeds to support DBIA-Western Pacific Region including student chapters & scholarships.

Continuing to educate upcoming Design Builders is one of the building blocks of our industry.

Our programs and golf tournaments help fund several student development activities:

- Participation at our National Conferences
- Teams to the Reno DB competition
- Ten \$4,000 Scholarships
- Sponsorships of programs and student events

The Western Pacific Region currently sponsors student chapters and activities at Long Beach State, Cal Poly San Luis Obispo, Chico State, Sacramento State, Stanford University with additional schools in the development stages.

Thank you for your support of DBIA-WPR and especially up and coming students!!

About the Design Build Institute of America

The Design-Build Institute of America (DBIA) was founded in 1993 to provide a voice for design-build practitioners, to advocate best practices, to create and disseminate educational information, and to furnish advice and support to facility owners and users. Its membership includes design-builders, construction contractors, design professionals, subcontractors, representatives of government agencies, academics and other professionals.

Who Uses Design Build?

Design-Build is the project delivery system of choice on more than 50 percent of the non-residential construction projects in the European Community and more than 70 percent in Japan. In the United States, the private sector's use of design-build has been increasing during the past thirty years, and is found in a wide array of commercial, institutional and industrial applications. In the U.S. sector, the federal government, as well as many states and local governments, employ design-build contracting for a significant percentage of their building programs.
