

DBIA-WPR WATER/WASTEWATER WEBINAR COLLABORATION FOR LUMP SUM DESIGN-BUILD PROJECTS IN UNCERTAIN ECONOMIC TIMES

Join **DBIA-WPR Water/Wastewater Committee** for a webinar. Collaborative project delivery offers owners and Design-Builders the ability to assign risk to the entity best able to manage the risk. What happens in today's uncertain market? Do you rely on contract protections, or do you roll up your sleeves and work diligently to find solutions? The Stanislaus Regional Water Authority (SRWA) developed mitigation alternatives to maintain schedule and budgets with quick decision making. Early procurement decisions, early construction packages, collaboration between the designer and contractor to align with material availability, and frequent communication with manufacturers and suppliers was shown to be effective in minimizing overall project impacts. Project solutions to address market volatility is one of the many areas of focus in collaborative project delivery and the SRWA experience demonstrates how to maneuver through some of the most challenging market conditions seen in our lifetime.

2023 WATER/WASTEWATER WEBINAR FRIDAY, OCTOBER 27, 2023

Log On: 11:55am PDT
Webinar Begins: 12:00pm PDT

REGISTRATION LINK ONLINE AT
dbiawpr.org
