

DBIA-WPR WATER/WASTEWATER WEBINAR PROGRESSIVE DESIGN-BUILD DELIVERY METHOD LEADS TO INNOVATIVE ADVANCED WATER PURIFICATION FACILITY PROJECT

Join **DBIA-WPR Water/Wastewater Committee** for a webinar. Los Angeles Sanitation and Environment and Los Angeles Department of Water and Power are in partnership to deliver the largest advanced drinking water facility in the Los Angeles area, helping to improve water sustainability. Together they selected Jacobs as the Design-Builder and are being supported by Carollo Engineers, Hazen and Sawyer, and Trussell Technologies as advisors. Hear how this high-performing collective client/advisor/design-builder team is achieving objectives, re-evaluating design criteria and capitalizing on innovation to deliver increased flow capacity, and how they navigated through GMP discussions.
