The Competition

This marks the Western Pacific Region's 11th annual design-build awards competition!

To be considered for a Regional Design-Build Award, projects must demonstrate successful application of design-build best practices as defined by the DBIA Design-Build Manual of Practice. These include: early integration of key team members during the proposal process via a proposal charrette or other collaborative outreach effort and close coordination between design and construction team members from the design development stage through field construction.

The acceptance of single-entity risk is a defining feature of design-build project delivery and winning submissions must be carried out under a DBIA or other single-responsibility contract. Only projects completed on time, on budget and without litigation will be considered for an award. Projects are honored for design and construction that meets or exceeds owner expectations.

The formal Western Pacific Region's Design-Build Awards will be made during the Design-Build Awards program on Thursday, May 18, 2017 at Westin Pasadena. Finalists will be notified on or about May 1st.

Eligibility

Eligible projects are located in California, Nevada, Hawaii, and Arizona. All design-build projects completed within the three years prior to January 31, 2017, are eligible.

Projects may be submitted for the Western Pacific Region Design-Build Awards no more than in two different calendar year competitions (excluding projects that already won a WPR award).

CALL FOR ENTRIES

WESTERN PACIFIC REGION 2017 DESIGN BUILD AWARDS

Projects must be delivered under a single-source contract between the owner/user and the design-builder or the design-build team what was considered "at risk" for both cost and schedule. Eligibility is not based on the use of a DBIA contract document; any single-source contracted project meets this criterion.

All qualified teams are encouraged to submit entries. DBIA membership is not an award criterion.

AWARDS

Awards will be given at the discretion of the judges at the following levels:

Award of Merit

Excellent implementation of design-build techniques meeting or exceeding the owner's expectations. One or more awards may be given at this level.

Award of Distinction

Successful analysis of design-build strategies resulting in a unique application of teaming to exceed the owner's needs. One or more awards may be given at this level.

Regional Excellence

Exemplify the principles of interdisciplinary teamwork, innovation and problem solving. "break new ground" in their approach and accomplishments.

Project of the Year

Chosen from all categories, one project will be awarded the top award of the entire program.

Design Excellence

Honors projects that achieve an owner's overall aesthetic and functional vision through outstanding design.

Also submit your project in the National Awards Competition. Remember: Western Pacific Region requirements are *similar* to the National Awards Program, but have significant variation in requirements. Refer to www.DBIA.org for information regarding the National Competition.

Tab 1 – Why this Project Should Win a Design-Build Award - Maximum of 2 pages (25 points)

Provide a narrative description of the project (i.e. size, location, etc.) the project goals, the challenges and constraints of the project, the owner's design objectives and the team's efforts to realize them.

Judging

A jury of industry experts will evaluate project submissions primarily on successful achievement of the owner's project goals through implementation of design-build best practices as defined by DBIA's Design-Build Manual of Practice. Submissions should highlight the design-build team's collaborative efforts to add value to the project. DBIA best practices include but are not limited to early integration of key team members during the proposal process via charrette or other collaborative outreach effort; collocation of project team members to encourage coordination between design and construction team members; and the use of incentives within the project team.

Owner's design objectives and the team's efforts to realize them should be addressed in all submissions.

Tab 2 – Design Excellence - *Maximum of 2 page (20 points)*

Describe the owner's criteria for design excellence and how it was achieved by the team. Client criteria for design excellence could include such elements as: embracing the client's values and transforming organizational performance; improving the site; advancing innovation in building materials and systems; providing a visual/aesthetic contribution to the community; and/or achieving the highest level of sustainability.

Tab 3 – Photographs – Please provide seven to ten images in the submission pdf, as well as providing them in separate, high resolution jpg files.

Applicants are responsible for obtaining the rights from their photographer to reprint the photographs without limitations. Ownership of a physical photo is not sufficient. Photographers normally retain the copyright of photos, so applicants should ensure that they have permission to copy and send photos to DBIA for use without limitations. Professional photographers must be credited. Any liability for copyright violation shall be borne solely by the applicant.

Both "in-progress" and completed project photos are highly encouraged.

Tab 4 - Teaming - *Maximum of 1 page (20 points)*

What methods or approaches were employed to engage and interact "as one team" collaboratively throughout the design AND construction phases of the project?

Describe how the owner, various client stakeholders and end users were engaged as part of the team throughout the design and decision making process.

Tab 5 – Schedule and Cost Performance - *Maximum of 2 pages (25 points)*

Complete the Table below:

	Contracted	Actual	Explain Any Variation
Start Date			
Completion Date			
Project Cost			

Describe the approach and methods that were employed to facilitate and manage the "design to budget" throughout the design phase of the project.

Give examples of how you provided the owner with the "best value for dollar spent".

Describe how the design-build team met required schedule dates. If there were any changes, explain why. Describe any special or unusual challenges involved in meeting the schedule.

Tab 6 – Safety - *Maximum of 1 page (10 points)*

Describe any specialized or innovative safety and health programs and training used specifically for this project.

Include a table that lists:

Total hours worked on the project	
Number of Recordable Incidents	
Number of Lost Time Incidents	

Submissions must disclose if there were fatalities on the project, and if so, provide a full explanation of the circumstances.
